Our catalogue is designed for both industry professionals and home gardening enthusiasts. From universal and specialty substrates to structural, organic, and finishing materials, every product is made with carefully selected raw materials and controlled processes to guarantee the highest quality, optimal aeration, drainage, and nutrition.

Whether you're looking for a substrate for indoor or outdoor plants, cacti, orchids, bonsai, or lawn, or solutions such as volcanic soil, coconut fiber, compost, natural manure, or pine bark, you'll find the ideal option to enhance the growth and health of your plants.

Committed to innovation and the environment, all our products reflect a single purpose: to care for the earth so that plants can flourish.

Explore our catalogue and discover the perfect solution for every project—whether small-scale or highly demanding.
